## “Connected home: Objects talking to each other”

Innovative, inspiring and beautifully-designed, Netatmo’s products enable their users to live in a safer, healthier and more comfortable home.

Netatmo is all about the Smart Home!

- Manage your house’s heating from our connected Thermostat, designed with Philippe Starck.
- Detect intruders and pesky animals wandering your garden with our cameras embedding artificial intelligence and image processing.
- Control your home’s lights and electrical sockets using our products designed with Legrand.
- Access the largest personal weather station network on earth from our world map of connected sensors.

**But how do they do that? How do they integrate into the growing ecosystem of connected objects?**

Please send us your CV or a link to your LinkedIn Profile to [jobs@netatmo.com](mailto:jobs@netatmo.com)
