

Join „stealth startup“ in Berlin, Germany

Ruby/Rails Developer

You are a developer with up-to-date knowledge of relevant techniques. You love to develop, improve & enhance fancy platforms, APIs and many more crazy things. Your math grades in school were above average. Your unique talent unfolds within a collaborative team at it's best.

Focus

- Create backend parts for the Rails-based platform (RoR).
- Take on ownership of specific product-modules such as, APIs, algorithms, server administration, etc.
- Work with the other lead developers to engineer a well-designed, maintainable and performing technology platform that can cope with the continuously growing traffic and business requirements.
- Continuously tune up performance and stability.
- Establish a smart system for fast user-driven improvements.

Talent

- Building the best web-experiences is what you live for.
- Real-world experience in developing web applications/Ruby on Rails.
- Either strong a) API or b) Server Administration experience is a plus
- Previous work experience in a start-up environment with a successful track record in engineering scalable systems is a plus
- Experience with travel, payment services or game development is a plus

What we offer

- Creating a really, really great & revolutionary product: Changing the world of travelling.
- Working environment where your contribution can - and will - make a difference
- Fun place to work, located in one of Europe's most dynamic capital

APPLY NOW!

→ makingmomproud@projectlebowski.com

→ send your CV. Tell us how you will “kick ass” 😊

→ once you apply, we will tell you more about our startup

→ www.projectlebowski.com (HR) & www.penelope.travel (company website)

© Project Lebowski is hot startup, run by Penelope Company. Currently working in „stealth mode“.
