Type: Engineering

Job Title: Structural Designer (TIA 3)

Job Description:

This is a great opportunity for a Mechanical Engineering Student.

You will be working with the Companies Structural Designers; your role will consist of the production of CAD Models and drawings for equipment / parts. The drawings will be used as a part of the Aircraft installation designs.The process will involve using data from equipment installation manuals and drawings.
Your work will then be expanded to include mounting of components and following the Companies design procedures and use of mounting hardware.

Your tasks will be, but are not limited by:

- Producing CAD models and drawings for equipments/parts
- Research into equipment installation manuals and drawings
- Mounting of components
- Creating training manual for future student
- 40 Working hours a week

Essential requirements:

- Excellent English, written and spoken
- Studying Mechanical Engineering degree or similar
- Strong 3D AutoCAD skills (or similar programme)
- Strong Solid works skills

Start Date: June 2012

Duration of Placement: 6 months

Location: Coventry

Remuneration: £ 500 per month
