## Certificación en Riesgos y Controles de TI

**CRISC** — Certified in Risk and Information Systems Control™ — An ISACA® Certification

## I AM MORE EMPLOYABLE

"My **Certified in Risk and Information Systems Control™ (CRISC™)** designation is the only certification that enables me to provide guidance on the impact of risk and its effect on the overall health of the enterprise."

CRISC is one of the most current and rigorous assessments available to evaluate and recognize the technology risk and control abilities of IT business and risk professionals.

Becoming CRISC-certified has given me a common language to communicate within IT and the rest of the enterprise about risk. My enterprise is therefore empowered to make effective risk-based decisions and prioritize resources for areas that are most at risk.
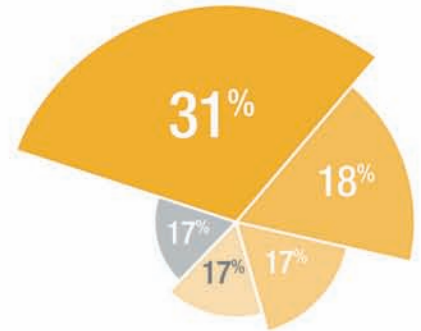

Various studies continue to rank ISACA certifications among the most sought after and highest paying IT certifications.

Become a CRISC to future-proof your career and your organization.

*I am a CRISC*
