

Kaspersky Lab

“Conferences for Young Professionals.”

These yearly worldwide conferences aim to **promote and reward research in the field of IT Security for which Bachelor´s, Master´s and Ph.D. students can apply.**

The next European one, i.e. the European Cup 2011, will take place **January 28th to 30th, 2011**, and will be **hosted by the University of Applied Sciences in Erfurt, Germany. Students from all over Europe are invited to submit a short research paper on or by December 6th, 2010**, which will then be evaluated by our committee of experts and university professors. The students with the best submissions will be invited to participate in the conference and present their research. **Expenses for travel and accommodation will be paid for by Kaspersky Lab.** As well as their own presentations they will benefit from our experts' presentations, workshops, panel discussion and teambuilding. They will also get the chance to mix, network and make valuable contacts for the future. All selected papers will be published electronically. In addition, the three winners will receive attractive prizes and an invitation to the next round, the International Cup, which will feature the winners from all our regional conferences for the Grand finale.

Some professors have already assured us of their collaboration and will encourage their students to participate in the conference.
