# Front-End/UI Developer

*You are in love with great web experiences. You are passionate with all aspects of front-end development and always up-to-date with the latest techniques and optimizations. You want to create an easy to use interface with the perfect „look & feel“. Design means spirituality to you.*

## Focus

- Build up our customer experiences. You are working on the digital spirituality of the platform. You create the face, look and smile of our product.
- Work closely with our programmers, designers and external agencies to deliver a great web experience.
- Create a holistic design approach as part of an overall engineering strategy across the platform.
- You work very closely with our back-end, product and community teams
- Run experiments and benchmarks

## Talent

- Real-work experience in front-end / user interface development
- Well rooted in the UI-developer community
- Strong skills working with JavaScript and jQuery.
- Deep understanding of CSS3 and how to use it to your advantage in design and performance.
- Experience with travel, payment or gaming development is a plus.
- Experience in working with mobile theming is a plus.

## What we offer

- Creating a really, really great & revolutionary product: Changing the world of travelling.
- Working environment where your contribution can - and will - make a difference
- Fun place to work, located in one of Europe's most dynamic capital

## APPLY NOW!
