

Curso de Certificación Oficial Director de Seguridad TI Certificado

I AM MORE CREDIBLE

"In my role as a manager of information security, I am responsible for overseeing network security products across global locations. With malicious attacks and cybercrime on the rise, my **Certified Information Security Manager[®] (CISM[®])** designation means I have the skills to manage, develop and implement an enterprise's information security systems."

This unique management-focused certification promotes international security practices and, is a globally accepted standard of achievement.

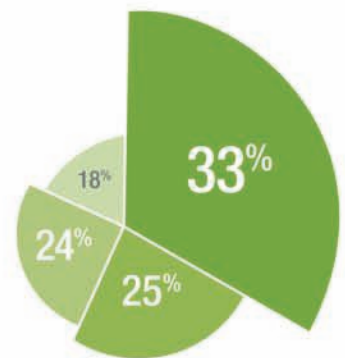

Becoming CISM-certified has given me higher earning potential and career advancement.

Recent studies continue to rank ISACA certifications among the highest paying and most sought after IT certifications.

Demonstrate your information security management expertise and increase your competitive edge by becoming a CISM.

I am a CISM
