C++ Software Developer-NET Software Developer

EMPRESA

worldwide provider of analysis and optimization solutions for multi-vendor and multi-technology mobile networks.

FUNCIONES

o Definition, development and implementation of optimization algorithms o Participate in the Development of a real-time platform to work with big data. Ensure that the real time system works efficiently. o Work actively in the development and stabilization of the platform 24x7 and ensure its smooth operation for large volumes of data (Big Data). o Conduct testing, work with assigned QA staff and/or client project manager to coordinate/assist in user testing procedures. Develop documentation as appropriate. o Work with on-site or internal project managers or analysts to review problems, define and test solutions, and develop reports for user management. o Responsible for analysis of current programs including performance, diagnosis and troubleshooting of problem programs, and designing solutions to problematic programming. o Provide assistance to testers and support personnel as needed to determine system problems and identify affected functionalities that require testing. · As a member of an agile team, participate in the development of a real-time platform for the analysis of signaling data coming from mobile networks · Design and implementation of GUI components · Implementation of optimization algorithms · Analysis and resolution of bugs and performance issues · Implement unit tests, automatize component and system tests, execute manual tests · Participate in the maintenance and evolution of the continuous integration system, as well as the development and testing environments · Writing of architecture and design documents · Provide assistance to testing, deployment and support teams · Provide support and transfer technical expertise to colleagues

REQUISITOS

C++ Expert (standard C++ libraries, C++ templates, SQL, XML) ; C++ memory management Professional experience of agile working methods Pertinent experience: 2 to 4 years of experience in analysis, design and object-oriented programming of software solutions Language requirements: Fluent in English. Education: BS/MS Degree level in Telecom, Computer Science, or equivalent Local work permit mandatory What we're looking for · Education: BS or MS in Telecommunications or Computer Science · Experience in C# and WPF · Experience with development of desktop applications · Knowledge of object oriented design, software architectural design patterns and clean code practices · Experience in unit testing · Fluent in English. Others valued: · Experience in the following technologies: - SQL Server - OpenGeo Suite (GeoServer, PostGIS) and Open Layers · Knowledge of MVVM pattern, XAML design, Entity Framework and Dependency Injection · Experience in agile methodologies: Scrum · Knowledge of continuous integration and continuous deployment
