

Mobile QA Engineer

Build38 is a cyber security start up that takes care of securing mobile apps. We enable all sorts of solution providers (from car manufactures to banks, from public transit operators to identity providers) to deliver their mobile use cases in a secure manner. We already protect millions of Android and iOS endpoints with our SDK which, together with our backend analytics platform, provides the most comprehensive mobile app security solution in the market.

Build38 is an international company, with the Head Quarters in Munich, a Sales office in Singapore and the tech hub in Barcelona.

We are looking a proactive, enthusiastic, and creative **Mobile QA Engineer** to integrate into our growing Agile teams. You will be responsible for designing and automating the testing environment at Build38.

In your day-to-day work, you will:

- Participate in translating High Level requirements into comprehensive behavioural scenarios
- Design, develop, execute and maintain test cases, for our Android and iOS SDKs and REST APIs
- Review and re-define the end-to-end testing strategy for our SDKs
- Establish testing culture as an integral part of the development process
- Develop maintainable automated checks in collaboration with our development team
- Proactively suggest improvements in testing tools for better test coverage
- Use exploratory testing techniques to discover and prevent issues
- Assess and bring improvements to the quality of our applications and services

You should have:

- Computer Science degree or similar.
- You know how to view quality holistically and ensure the highest software quality
- At least 4 years of relevant experience in testing
- Experience in testing C/C++ software
- Experience with Google Test framework
- Experience working on mobile (Android/iOS) environment (preferably in testing)
- Knowledge of at least one of the following programming languages:
Java/Kotlin/Objective-C/Swift
- You know how to work with Jira, TestRail, Jenkins, Docker, etc.
- You have experience in driving quality improvements in agile environments
- Experience in troubleshooting and root cause analysis
- Demonstrated capability and motivation to thrive in a fast-paced, demanding start-up environment.

What we can offer you:

- Optimized onboarding – for your optimal start and your customized induction.
- Enthusiastic team – waiting to help you succeed.
- Internationality – three locations worldwide with employees on 3 continents.
- Simplicity – because we like to make it easy and be practical.
- Green field – where you can explore and bring in your experience.
- Well-known customers – from the German and international economy.
- Beautiful office spaces in the heart of Munich and Barcelona – 200m to Marienplatz in Munich or the Sagrada Familia in Barcelona with regular team/community events (breakfast, lunch, beers...).
- Good transport connections – easy to reach by public transport.
- Attractive performance-based remuneration model – as motivation for YOUR motivation.
- Flexible working hours!

Tell us what excites you about security for mobile apps and what your passion and future plans are.

We want to get to know YOU and know who YOU are.
