

Backend Engineer – DevOps Engineer

Build38 is a cyber security start up that takes care of securing mobile apps. We enable all sorts of solution providers (from car manufactures to banks, from public transit operators to identity providers) to deliver their mobile use cases in a secure manner. We already protect millions of Android and iOS endpoints with our SDK which, together with our backend analytics platform, provides the most comprehensive mobile app security solution in the market.

Build38 is an international company, with the Head Quarters in Munich, a Sales office in Singapore and the tech hub in Barcelona.

We are looking for a **“DevOps Engineer”** for our growing team. You will work closely with the development team, setting up and managing the infrastructure, establishing enhancements in the processes and supporting continuous integration, delivery and deployment in the cloud.

In your day-to-day work, you will:

- Design and improve our architecture leveraging the latest technologies and approaches like microservices, containers and cloud computing.
- System performance monitoring, tuning, and troubleshooting.
- Infrastructure automation, orchestration, and security.
- Work closed to the development team to improve performance.
- Write and maintain custom scripts to increase system efficiency and lower the human intervention time on any tasks.
- Provide environment set up according to cross team's needs.
- Designing, implementing, and testing CI / CD pipelines.

You should have:

- Computer Science degree or similar.
- Experience in building and managing high availability, high performance environments with containers or cloud environments. Kubernetes knowledge is a plus.
- Strong background in Linux/Unix Administration.
- Solid experience in the administration and performance tuning of application stacks (e.g., Tomcat, JBoss, Apache, Ruby, NGINX).
- Background using automation tools (Terraform, Ansible, etc..)
- Solid Cloud experience in AWS.
- Automation is important for you.
- Team-player: you are open to ego-free discussions.
- Be a mentor: you like coaching Junior team members.

What we can offer you:

- Optimized onboarding – for your optimal start and your customized induction.
- Enthusiastic team – waiting to help you succeed.
- Internationality – three locations worldwide with employees on 3 continents.
- Simplicity – because we like to make it easy and be practical.
- Green field – where you can explore and bring in your experience.
- Well-known customers – from the German and international economy.

- Beautiful office spaces in the heart of Munich and Barcelona – 200m to Marienplatz in Munich or the Sagrada Familia in Barcelona with regular team/community events (breakfast, lunch, beers...).

- Good transport connections – easy to reach by public transport.
- Attractive performance-based remuneration model – as motivation for YOUR motivation.
- Flexible working hours!

Tell us what excites you about security for mobile apps and what your passion and future plans are.

We want to get to know YOU and know who YOU are.
