Transformation

The better the question. The better the answer. The better the world works.

Graduates Financial Consulting, Data and Analytics (f/m/d)

EY ifb Spain (Valencia)

EY ifb is part of the global EY Professional Services organization (www.ey.com). EY ifb is a leading European Consulting firm specializing in Financial Accounting and Financial Risk. EY ifb offers innovative Consulting based solutions to Banks and insurance companies both within Europe and Worldwide. EY ifb focus is introducing financial transformational business solutions utilizing the next generation of Business, IT, Cloud and AI applications. EY ifb is a world leading firm with some notable firsts in our list of credentials. Our success stories have been amassed over 30 years from working with our European and International clients.

WHAT YOU CAN EXPECT - Challenging work, with opportunities for International business travel

As you start your Consultant career, you will receive an intensive introduction to financial accounting, data, analytics, cloud/AI and other topics with our New Joiners 8-week specialized training. You will be learning alongside other EY ifb graduates hired as part of the same hiring intake. New Joiner training (NJT) includes theoretical and practice "hands on" exercises, the latter undertaken in small teams. After completing NJT your initial Junior Consultant career path will be agreed with you before your exciting and varied consulting future begins.

- Junior Consultants will join a team where you will apply your latest bootcamp knowledge directly to an assigned project.
- You will learn how to Implement financial accounting controls or mapping data into industrialized data models or developing descriptive and predictive analytics.
- You will learn how to analyze business-related problems based on your new financial or technological understanding.
- You might be part of a financial transformation project, as you and your EY ifb team introduces standardized business processes and regulatory controls to manage large European corporations' financials more efficiently.

You will benefit from our culture of teamwork which is characterized by challenging work, trust, cooperation, and innovative collective thinking.

These projects are exciting, as every client's situation is different. We are confident YOU will thrive under this wide variety of work.

YOUR SKILLS will shape an exciting future.

- ▶ If you have a good university degree (Bachelor, Diploma, Master, PhD) in either Computer Science, Physics, Mathematics, Business Administration, Data Science, Information Technology, or a related field.

Plus, you possess many of these personal characteristics -

- Strong analytical mindset
- Creative and independent working habits.
- Good work ethic and are detailed orientated.
- Grasp concepts and quickly breakdown complex topics into their constitute parts.
- Keen interest in finance or data & analytics or the latest Cloud/AI apps and related technologies.
- Enjoy working with others on a common goal.
- Like occasional International travel to meet Clients or attend Company events.
- Bilingual with good English language skills.

If its YES to many of these, then we need to talk to YOU.

WHAT ARE WE OFFERING - Internships and full time jobs with a flexible work environment

We understand that providing first-class service to our clients starts with satisfied and motivated employees. That's why we offer paid internships and full-time jobs with a range of benefits including flexible working arrangements and potential for temporary international assignments. Plus industry leading training and attending European company events.
